5-Port Fast Ethernet

N-Way Switch

The 5-Port Fast Ethernet N-Way Switch provides you a flexible, reliable, and affordable solution of the Ethernet network. It comes with five independent 10/100Mbps ports. Each port delivers up to 200Mbps throughput, and is able to operate in either half or full-duplex modes.

The 5-Port Fast Ethernet N-Way Switch also features N-Way (auto-negotiable), which automatically adjusts the device for optimal operation; "Store-and-Forward" architecture filters to eliminate error packets and improve efficiency. Plus, based on MDI/MDIX auto crossover technology, just use either a straight through or a crossover Ethernet cable, and you can get connected with any other devices.

Features

* Complies with IEEE 802.3 10Base-T and IEEE 802.3u 100Base-TX standards

* "Store and Forward" architecture filters

* IEEE 802.3x or Back Pressure (HDX) Flow Control

* 2K MAC Address table supported

* Five 10/100Mbps Auto-Detection ports

* 10/100Mbps auto-detection on Full or Half Duplex

* Power Feeding: +5Vdc/1.5A

* Each Ethernet port supports MDI/MDIX (auto crossover) capacity.
